PhD-Student wanted

For our project "Simulation of Biochemical Pathways" we are looking for a PhD-student in order to study the spatiotemporal behaviour of biochemical processes e.g. calcium signalling. The respective candidate should have some background on biochemistry and on the mathematical approach to the simulation of complex systems. However, the most important prerequisite is an interest in working in a very interdisciplinary field.

The project will be a cooperation between the bioinformatics group at the EML and Dr. Krömker, Prof. Jäger at the IWR, Heidelberg (informations at www.iwr.uni-heidelberg.de).

Salary depends on the experience of the applicant.

Applicants should send a short CV and letter to the address indicated below.

For further informations please contact

Dr. Erich Bornberg-Bauer, Tel. +49 6221 533-215, ebb@eml.org
or
Dr. Ursula Kummer, Tel. +49 6221 533-225, ursula.kummer@eml.org
